ALIREZA ASGHARI TABRIZI

Senior Frontend Engineer | React · Next.js · TypeScript

Muscat, Oman | +968 9148 9052 | alias1371@gmail.com

LinkedIn | GitHub | Athra Studio

PROFESSIONAL SUMMARY

Frontend-focused software engineer with 7+ years delivering production e-commerce and streaming platforms. Built a React merchant application used by 1,000+ sellers and designed the incremental Next.js 11→15 migration architecture for storefronts handling 100,000+ daily orders. Now leading client web development at Athra Studio in Oman. Available for international remote and B2B contracts.

PROFESSIONAL EXPERIENCE

Founder & Lead Software Engineer — Athra Studio | Oct 2026 – Present | Muscat, Oman

- Lead client and in-house development with Vue/Nuxt, .NET, Docker and Cloudflare; use Claude Code and OpenAI Codex for AI-assisted implementation, debugging and development workflows.
- SeaJoy (seajoyoman.com): delivered a live Oman tour-discovery and booking website using Vue/Nuxt and .NET; bookings trigger email notifications to the business owner. Online payment integration is pending.
- Ghappan (in development): building a finance and inventory management application with workflows to capture purchase, sale and settlement records from invoice and bank-receipt photos.

Senior Full-Stack Developer — Okala | Nov 2022 – Sep 2026 | Online grocery

- Designed Next.js 11→15 migration architecture for two production storefronts handling 100,000+ daily orders, using shared packages and Nginx routing for phased, zero-downtime cutover.
- Independently built and launched a React/Vite merchant application used daily by 1,000+ sellers, including real-time order notifications and custom audio alerts.
- Migrated an internal back-office frontend from Angular to React; also developed an internal .NET parking-reservation system and contributed to Kafka/Flink/Redis services.

Front-End Developer — Gapfilm | Oct 2020 – Oct 2022 | Video streaming

- Built and maintained an SSR-first Vue/Nuxt frontend for a high-traffic subscription video platform; developed Samsung Tizen support for constrained, low-power browsers.

Full-Stack Developer — Irantic | Nov 2019 – Nov 2020 | Event ticketing

- Built the event-ticketing frontend independently with Vue, Laravel SSR and custom CSS, without UI libraries.

SELECTED INDEPENDENT PROJECT

Algorithmic Trading Research Platform | C#/.NET · Python

- Developed event-driven market-data processing and a backtesting framework with transaction-cost modeling, out-of-sample evaluation and stress testing.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js (App Router/RSC), Vue, Nuxt, SSR, Vite, Zustand, Redux Toolkit, Tailwind CSS, web performance

Backend & delivery: C#/.NET Web API, Entity Framework, REST, SQL Server, PostgreSQL, Kafka, Flink, Redis, Docker, Nginx, Cloudflare, Kubernetes, GitHub Actions, ArgoCD | AI-assisted development: Claude Code, OpenAI Codex

EDUCATION & LANGUAGES

B.Sc. Chemistry — Shahid Beheshti University (2017) | React Bootcamp — MAPSAHR Group (2021)

Persian: Native | English: Professional working proficiency
